

Loading YEAHub on your computer

Open your browser, and navigate to the URL: <https://yehub.net/MPR.php>,
You should see a login screen that looks like this:

Browser Selection:

- All Browsers will have to be allowed to have Pop-Ups. It is critical to “allow Pop-ups”, otherwise you won’t be able to see any of the documents on YEAH
- Don’t use Microsoft Edge...no matter what
- Chrome is recommended. To allow Pop-Ups, go to Settings:

Then go to Show Advanced Settings, then under Privacy you will see Content Settings

Privacy

Google Chrome manages web services to improve your browsing experience

Then go to Pop-Ups:

Pop-ups

- Allow all sites to show pop-ups
- Do not allow any site to show pop-ups (recommended)

Manage exceptions...

Then Click on Manage Exceptions, and add "yehub.net" as an Exception.

Pop-up exceptions

Hostname pattern	Behavior
http://support2.bobcatnet.com:80	Allow
[*]support2.bobcatnet.com	Allow
https://dealers.sandhills.com:443	Allow
https://[*]dealers.sandhills.com:443	Allow
yehub.net	Allow
[*]example.com	Allow

[Learn more](#)

Done

Safari Browser- Google "Allow Pop-Ups on Safari", and follow the directions.

Once this is done, you will be bale to download large files at superfast speeds!
Enjoy!

If you are having troubles, please contact the D5470 Database Manager, Jim Duke, at jimduke@targetrental.com.
